Introductory class

CS 48N, Winter 2011

Marc Levoy
Computer Science Department
Stanford University

Kleitias and Ergotimos, Francois Vase (570 B.C.)

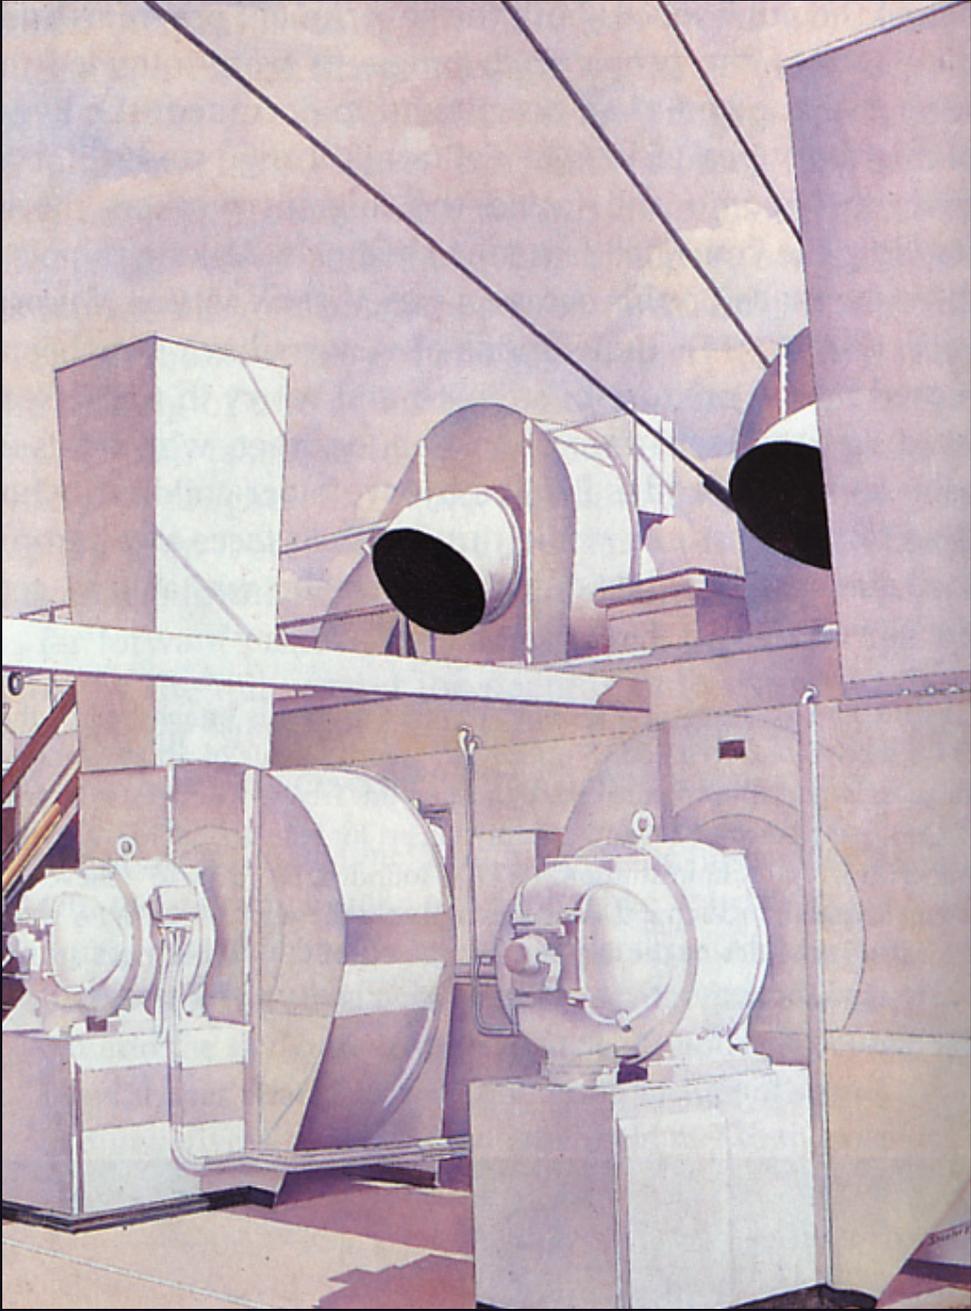

Gnosis, Stag Hunt (300 B.C.)

Kleitias and Ergotimos, Francois Vase (570 B.C.)

Charles Sheeler, The Upper Deck (1929)

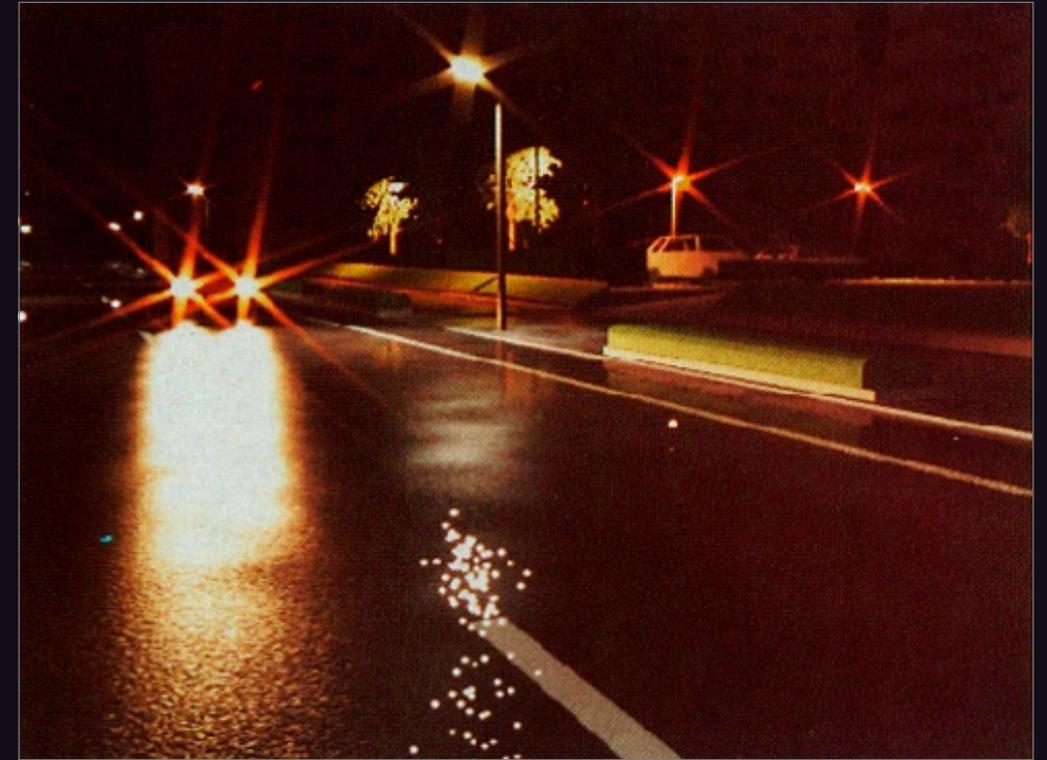

Joseph Wright, A Philosopher Giving a Lecture at the Orrery (1765)

Georges de La Tour, *The Carpenter* (1640s)

Georges de La Tour, The Carpenter (1640s)

Nakamae et al., A Lighting Model
Aiming at Drive Simulators,
Proc. Siggraph 1990

What is a style?

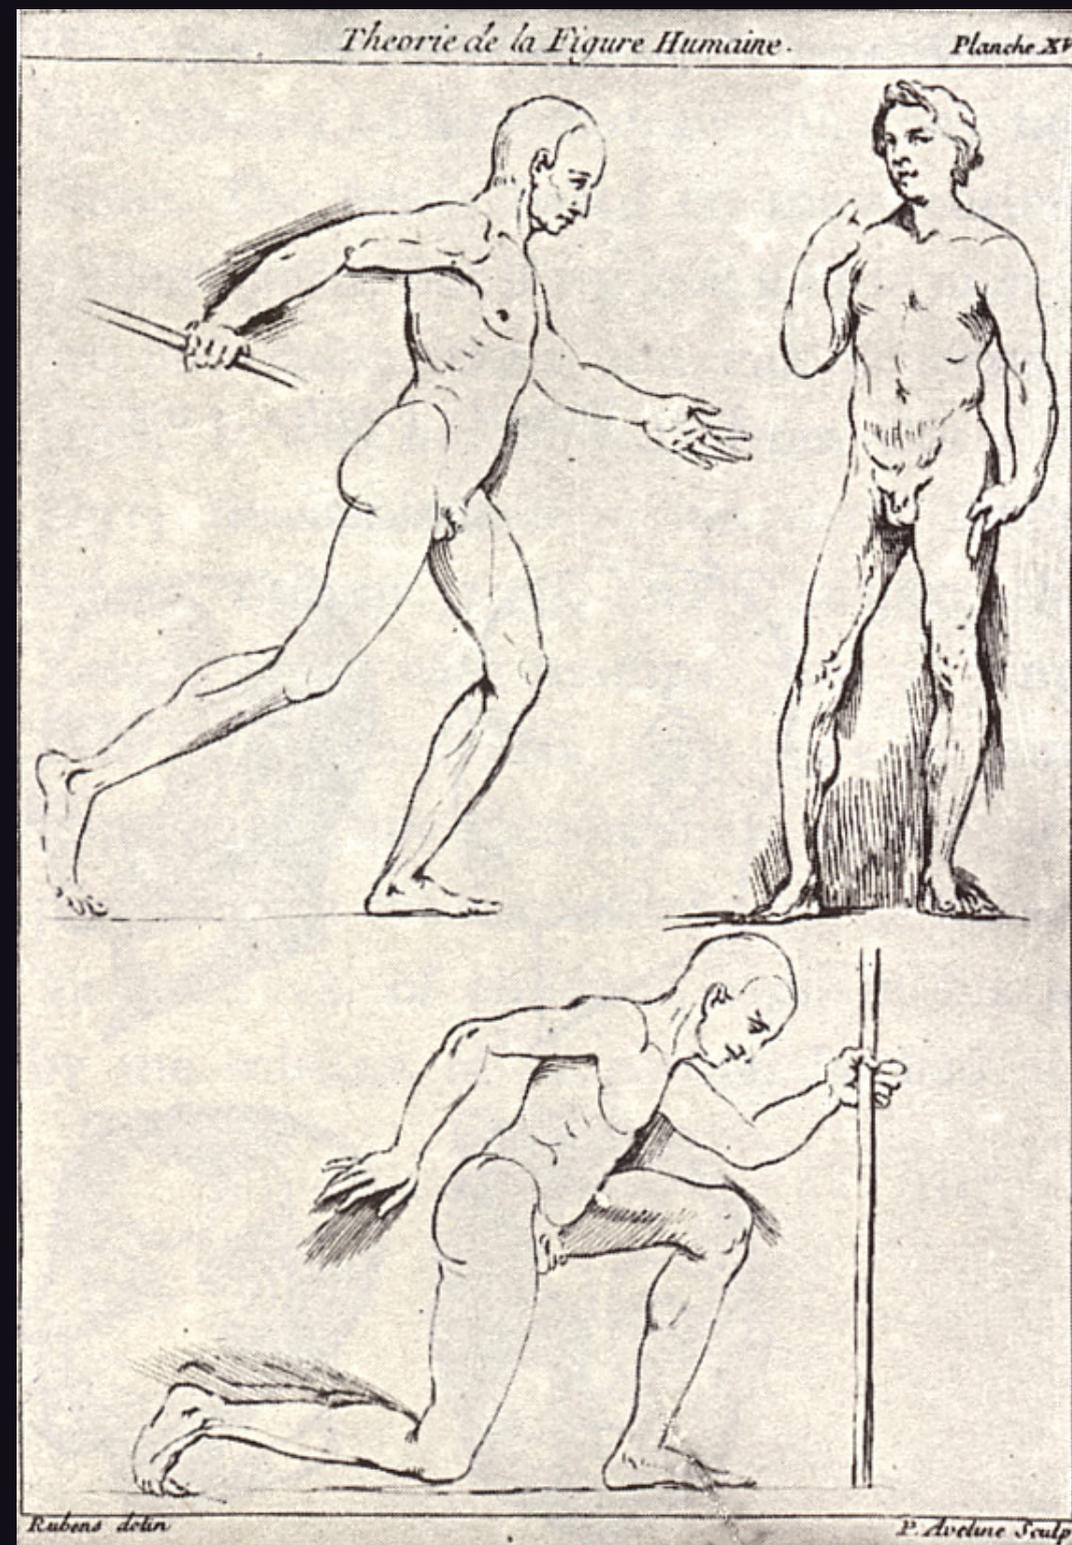

- ❖ the current state-of-the-art in imitating nature

Claude Lorraine, *The Tiber above Rome* (1640s)

What is a style?

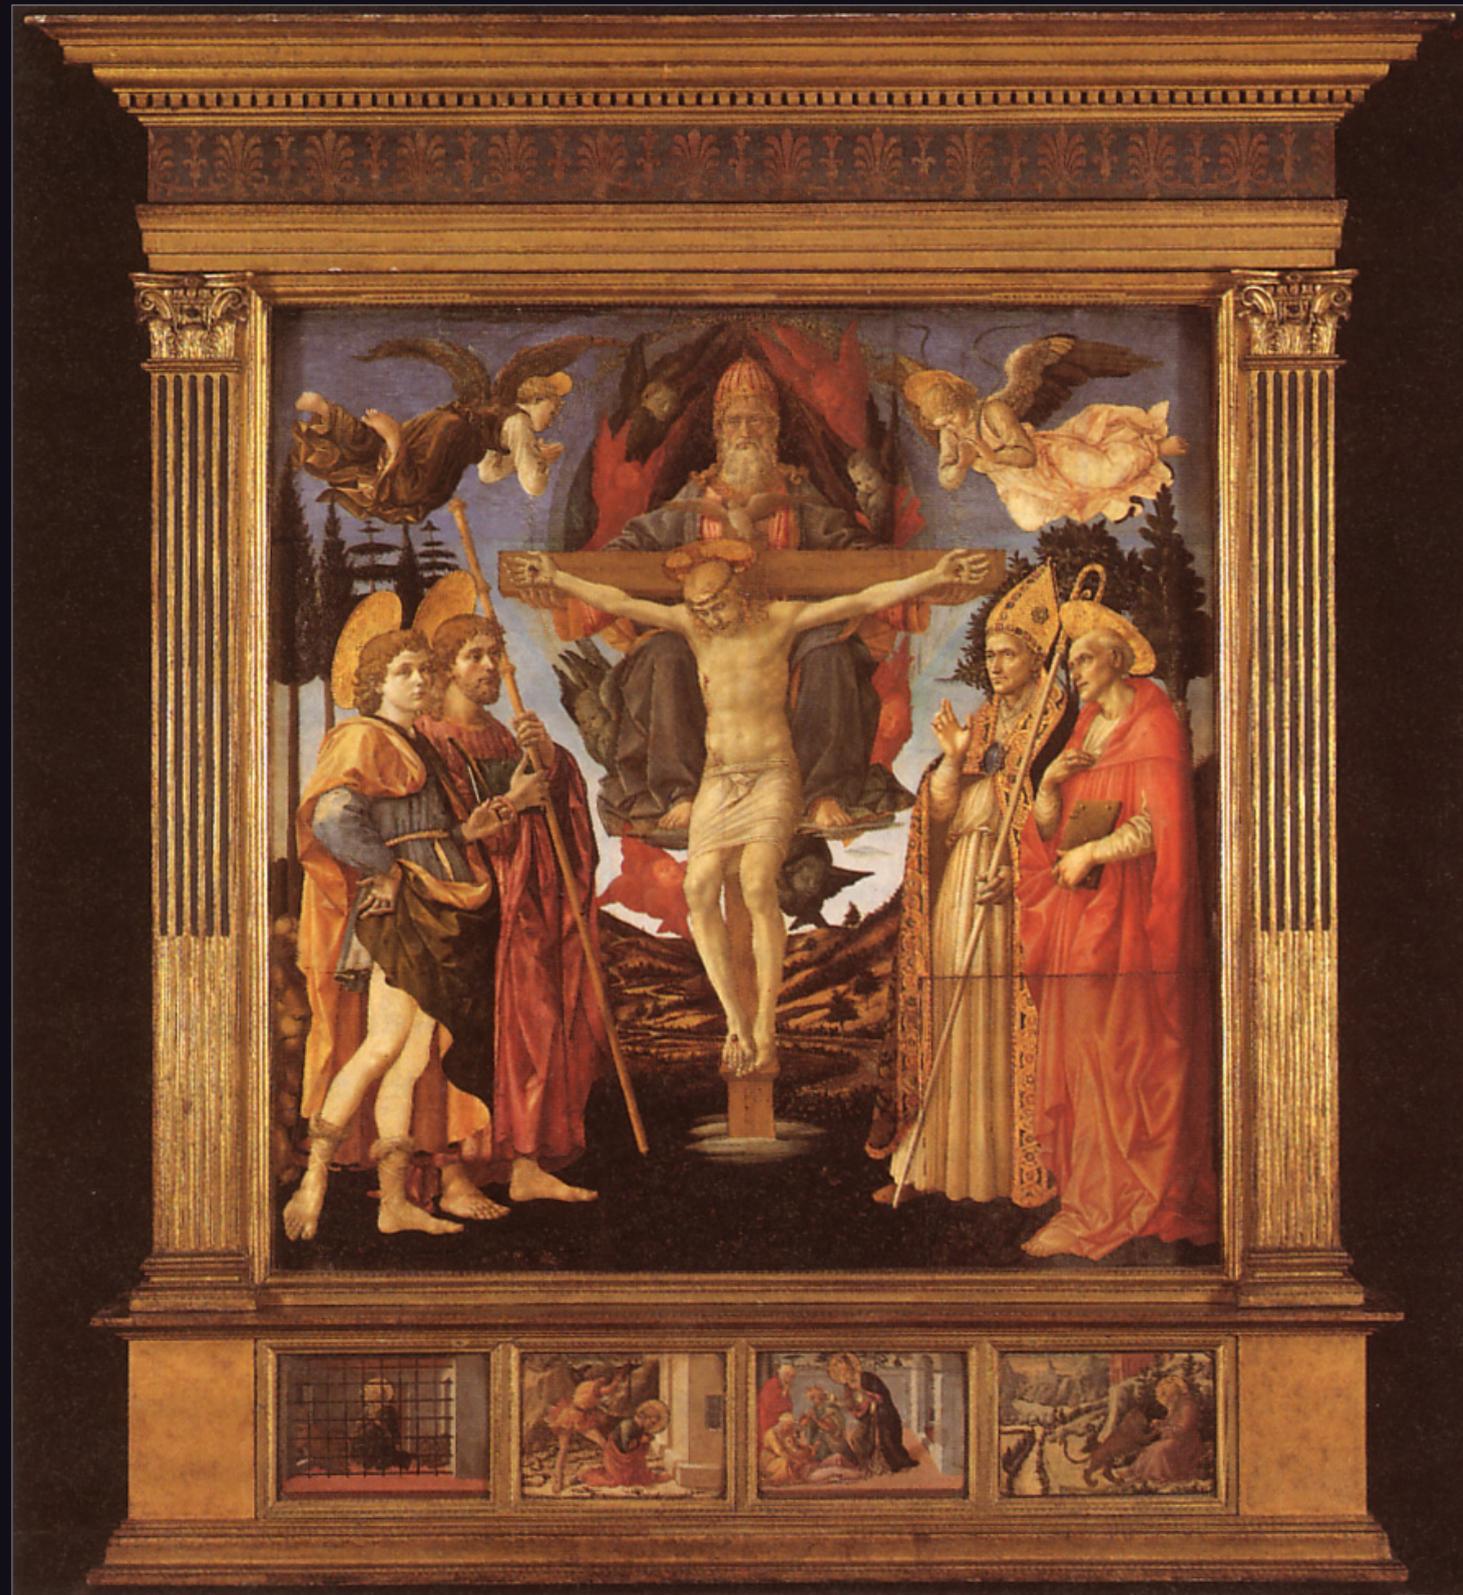

- ❖ the current state-of-the-art in imitating nature
- ❖ a learned set of conventions for representing nature
 - * a set of shared conventions
 - * that facilitate rapid perception
 - * using an economy of means

Peter Paul Rubens, *Theorie de la figure humaine* (1773)

What is a style?

- ❖ the current state-of-the-art in imitating nature
- ❖ a learned set of conventions for representing nature
 - * a set of shared conventions
 - * that facilitate rapid perception
 - * using an economy of means
- ❖ a choice of representation that evokes an emotion

Fra Filippo Lippi, Trinity Altarpiece (1457)

Michelangelo, Sistine Chapel, The Prophet Joel (1512)

before restoration

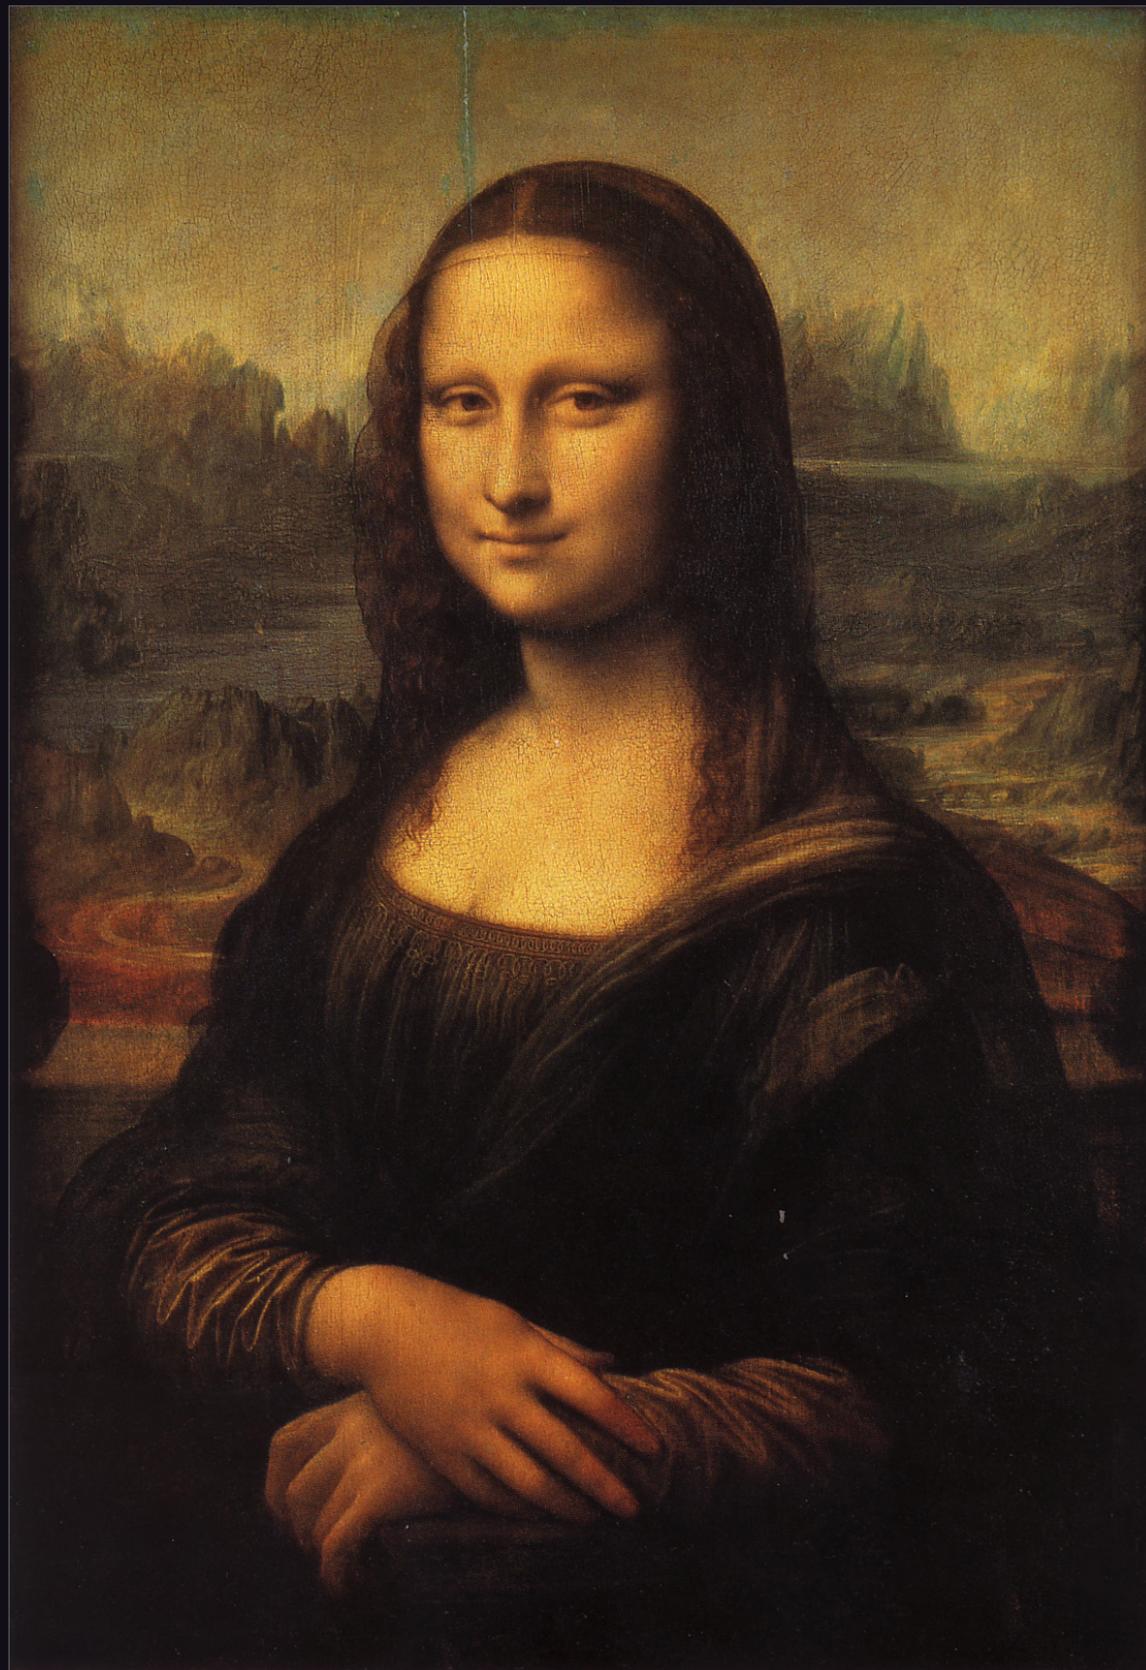

after 1980s restoration

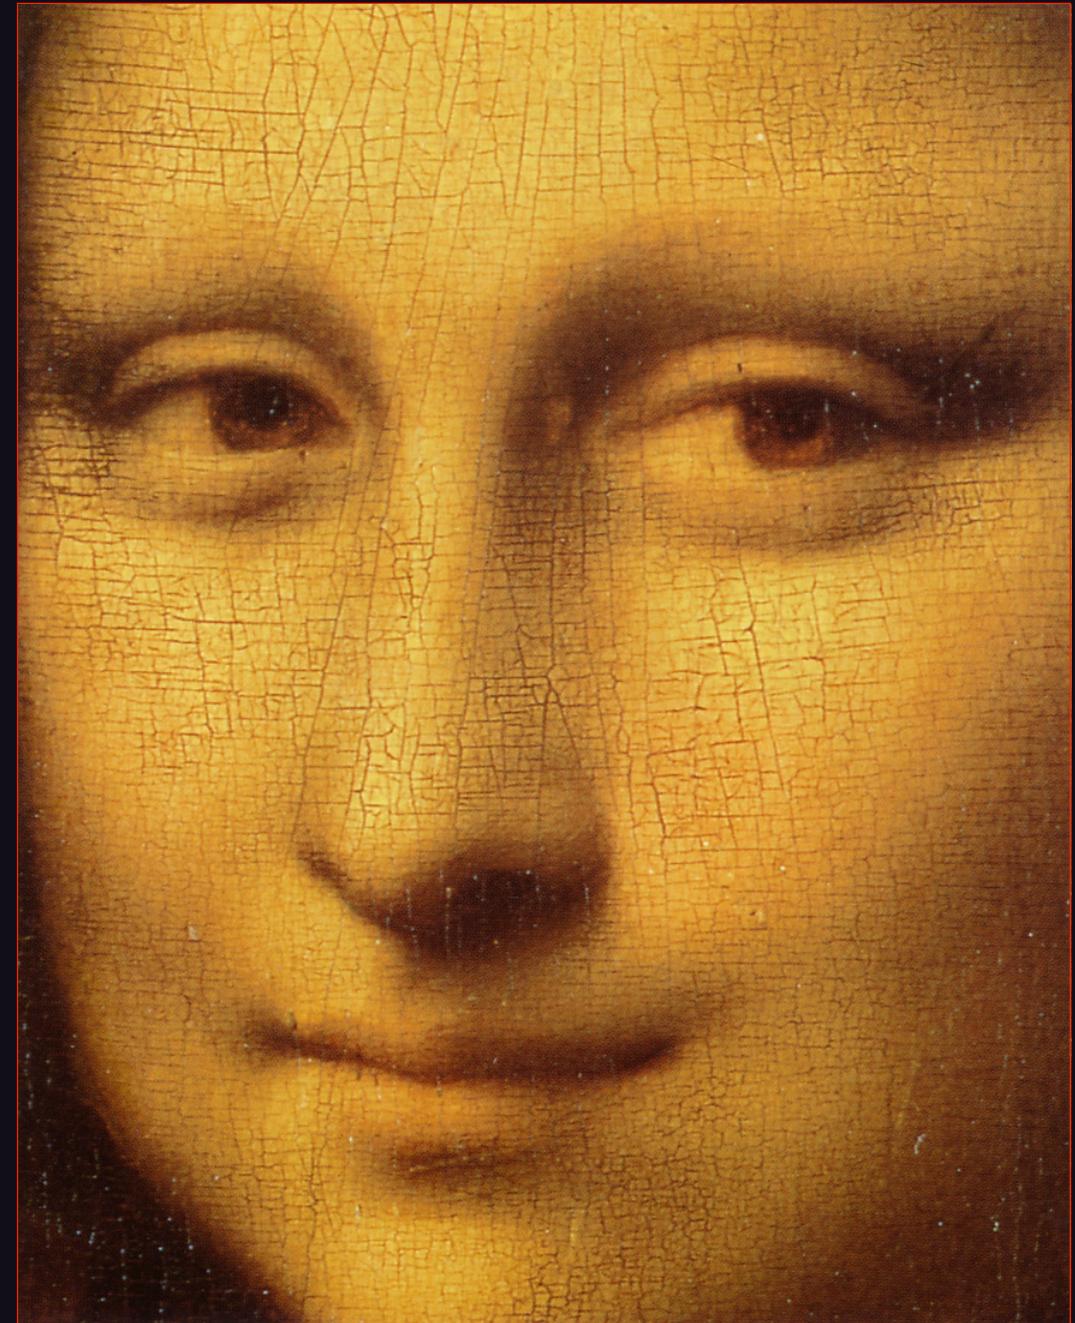

Michelangelo, Sistine Chapel, The Prophet Joel (1512)

Leonardo,
Mona Lisa (1502)

Leonardo,
Mona Lisa (1502)

Questions about illusionistic art

- ❖ What do scientists know about creating an illusion of nature?

Questions about illusionistic art

- ❖ What do scientists know about creating an illusion of nature?
- ❖ How do specific artistic techniques work to create this illusion?

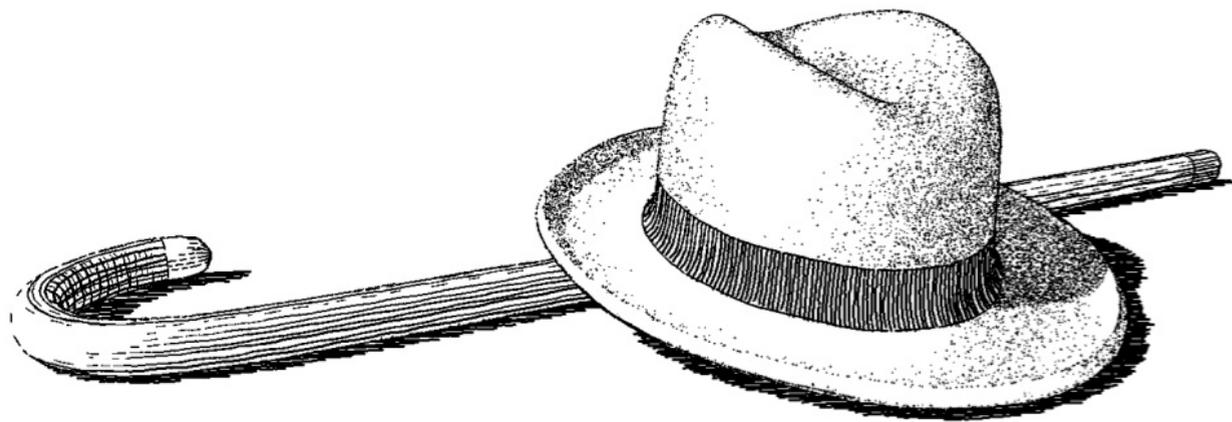

Questions about illusionistic art

- ❖ What do scientists know about creating an illusion of nature?
- ❖ How do specific artistic techniques work to create this illusion?
- ❖ If we can mathematically model the limitations of images as a medium, and we know and can model illusionistic techniques for overcoming these limitations, can we "compute" optimum illusions?

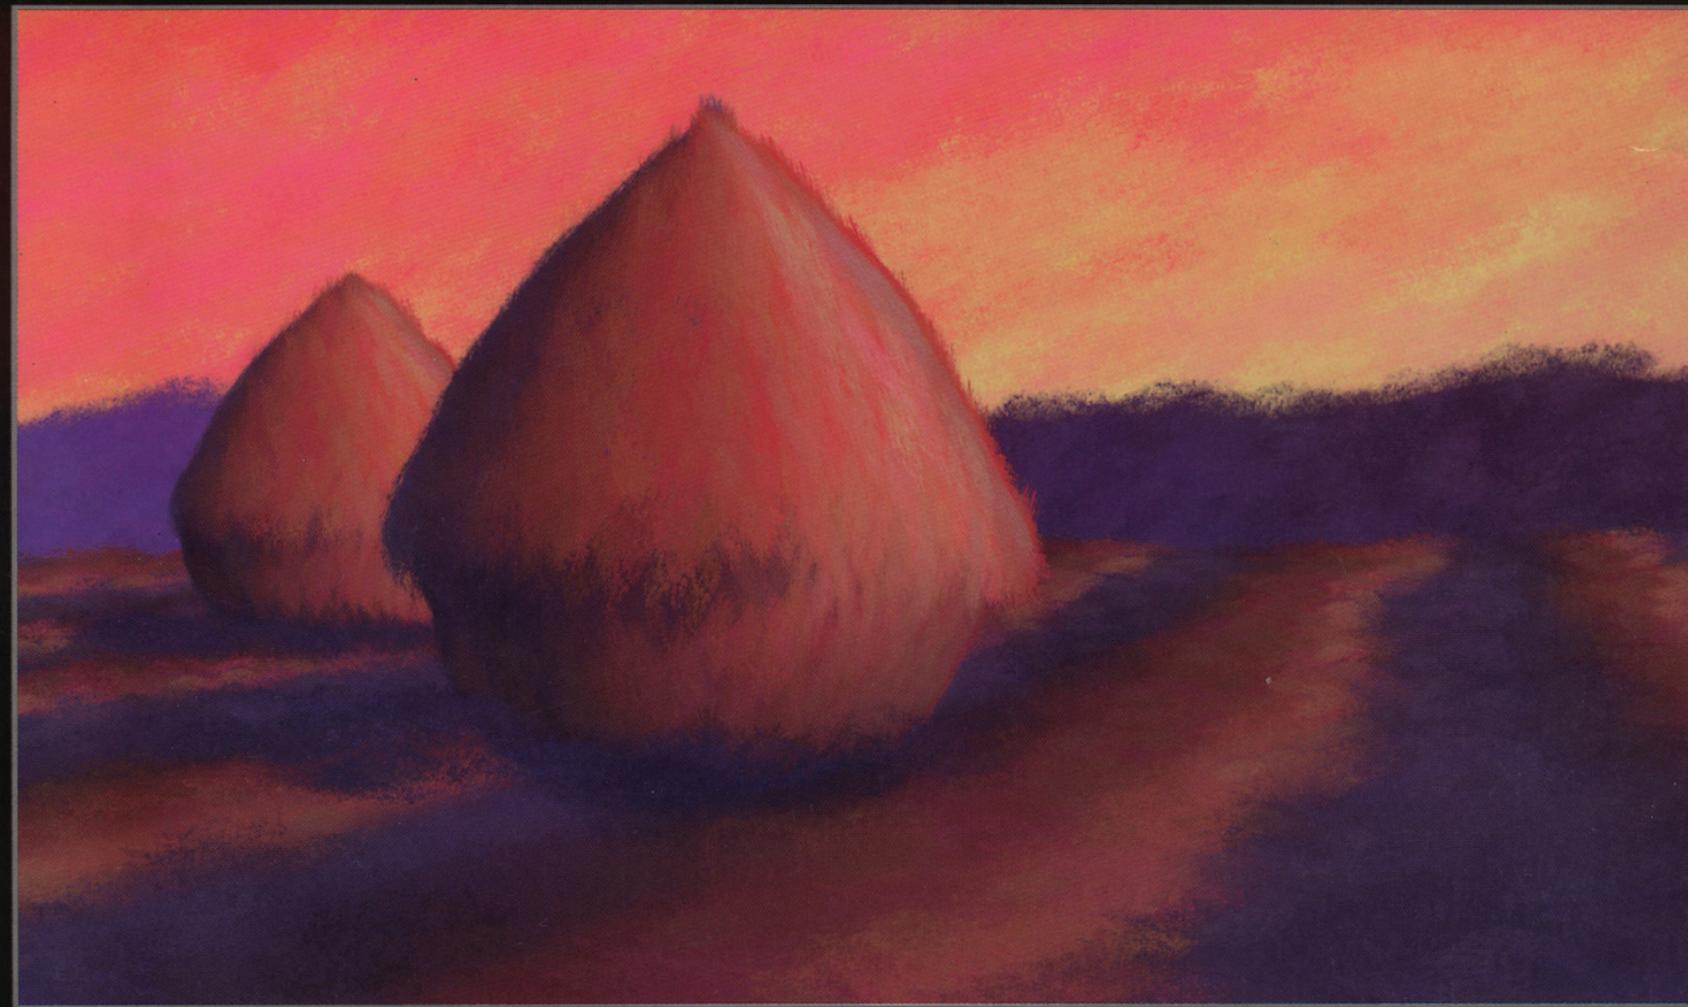

Questions about illusionistic art

- ❖ What do scientists know about creating an illusion of nature?
- ❖ How do specific artistic techniques work to create this illusion?
- ❖ If we can mathematically model the limitations of images as a medium, and we know and can model illusionistic techniques for overcoming these limitations, can we "compute" optimum illusions?
- ❖ Can we automatically (or semi-automatically) compute non-illusionistic stylistic renderings, e.g. for illustration of scientific data?

Winkenbach et al., Rendering
Parametric Surfaces in Pen and Ink,
Proc. Siggraph 1996
